Benefits of "T"

Controls hydrogen sulfide odors

Enhances BOD and COD removal while improving sludge settlement

Reduces hydrogen sulfide related to corrosion of the sewer lines

Reduces the accumulation of unsightly deposits of fats, oils and greases

Works in the lift station, force main, and gravity main through to the treatment plant or lagoon

Product Description - Sulphide Control

"T" is a potent combination of billions of active Aerobic, Anaerobic and Facultative bacteria cultures which are specially engineered to facilitate the oxidation of sulfur compounds, reducing obnoxious hydrogen sulfide (H₂S) odors. This product comes packaged in bulk or convenient water soluble dosage packets.

"T" will enhance and accelerate naturally occurring "sulfur cycles", converting sulfur compounds into "elemental sulfur" (S) and water (H₂O). Additional bacteria culture/enzymes included in "T" will help degrade organic hydrocarbons.

"T" is non-toxic, biodegradable, non-corrosive, non-volatile, and non-flammable.
